Elec-Trak: A line of battery powered electric lawn & garden tractors built by General Electric from 1969-1974. Eleven models were made in HP ranges from 8-20 with most powered by 6 six volt golf cart batteries. The line was bought by Wheel Horse in 1974 who continued marketing 3 models as their own until 1977. Both companies also produced models for New Idea with slight differences.

To determine the year your GE Elec-Trak was manufactured, use the second digit of its serial number with the chart below.

N=1970
P=1971
R=1972
S=1973
T=1974
